

Electrical Eaves- dropping by the Sig- nal Corps of the United States Army

The dicta-
graph re-
ceivers are
put any-
where they
will be handy.
Here is one
being placed
in a tree top

Listening for
the sound of
operations
by enemy
sappers. This
often entails
a great deal
of danger and
discomfort

Crawling up
to an enemy
trench to
place a trans-
mitter, which
is cunningly
camouflaged
in a battered
tomato can

A trench re-
ceiving sta-
tion where
the conver-
sation and
movements
overheard by
the transmit-
ter are noted
