

It's Bombs Such as These
That the Kaiser's Agents
Have Been Using to Blow
Up Our Factories and Ships

Throw the coal bomb in a ship's furnace and then—Look Out!

Papier-maché bomb made to resemble coal and filled with exceedingly high explosive

In center of bomb is space for ignition mechanism and detonator. The rest is trinitrotoluol and fiendishness. Many such are made

Another of the tall thermite bombs

Fountain containing batteries, a detonator, and high explosives

These bottles are full of a powerful acid to eat off detonator wires
